ALGORITHM AND ALERT PROCESS FOR THE PREDICTION AND PREVENTION IN-PATIENT TREATMENT-RELATED SEVERE HYPOGLYCEMIA

Tobin, Garry

Zou, Dianxiong

T-012472

Technology Description: A hospital-based algorithm and associated software that is able to predict which in-patients on diabetic therapy will develop hypoglycemia. It is able to predict in real time which patients are at risk and alert MDs to start interventions to prevent possible side effects or death.
