

DEVELOPMENT OF A PRECLINICAL NF1-MPNST PLATFORM SUITABLE FOR PRECISION ONCOLOGY DRUG DISCOVERY AND EVALUATION

[Hirbe, Angela, Li, Shunqiang](#)

[Hanford, Charles](#)

T-019044

This technology contains a set of patient derived xenograft cell lines. These cell lines represent the heterogeneity of human malignant peripheral nerve sheath tumors (MPNSTs) that can be used to test novel agents to move forward into clinical trials.
