

MURINE HYBRIDOMA PRODUCING IGG1 MONOCLONAL ANTIBODY TO HUMAN SIRP-B2

[Colonna, Marco](#)

[Poranki, Deepika](#)

T-005412

Monoclonal antibodies were raised in a 4-to 8 week-old female Balb/c mouse by immunization with a recombinant GST fusion protein containing the whole extracellular domain of SIRPB1. These can be used to study T-cell activation and the induction of antigen-specific cytotoxic T-lymphocyte responses by dendritic cells.

Publication: [Signal-regulatory protein a \(SIRPa\) but not SIRPb is involved in T-cell activation, binds to CD47 with high affinity and is expressed on immature CD34⁺CD38⁻ hematopoietic cells.](#)
