

RAT HYBRIDOMA PRODUCING MONOCLONAL ANTIBODIES AGAINST MOUSE PDCA1

<u>Blasius, Amanda, Cella, Marina, Colonna, Marco</u> <u>Poranki, Deepika</u>

T-004377

Antibodies were produced by immunizing Wistar/CRL rats with CpG oligodeoxynucleotide 1826 or heat-killed Mycobacteria tuberculosis. The antibodies are specific for mouse IFN-producing cells (IPC).

Publication: <u>Bone Marrow Stromal Cell Antigen 2 Is a Specific Marker of Type I IFN-Producing Cells in the Naive Mouse</u>, but a <u>Promiscuous Cell Surface Antigen following IFN Stimulation</u>
